

## How to connect to Eduroam in Windows 10

### Introduction

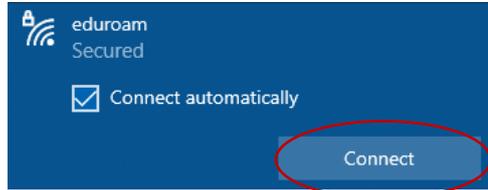

EduRoam is an agreement between a list of educational institutions to share access to their wireless networks. Being part of the EduRoam federation allows Queensland Museum Network Staff and students from other institutions who are visiting the Museums to connect to the EduRoam Wi-Fi network.

This guide will help show you how to connect to EduRoam network on a Windows 10 Platform.

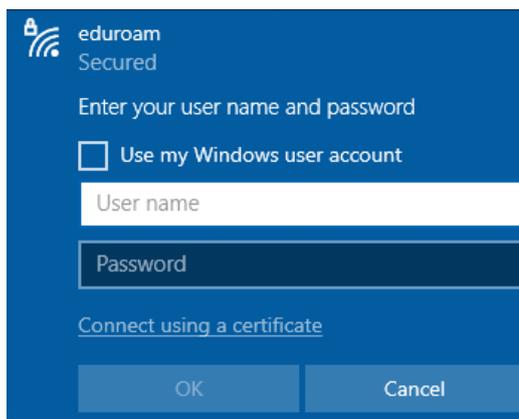

1. Select the Wi-Fi symbol on your taskbar.

2. Select eduroam on the Wi-Fi list and select Connect.

3. Use your institution credentials (your email address) to log in and select OK.

4. Select Connect. You are now connected to the EduRoam network.
